

SKYLIGHTS • WINDOWS • DOORS

The Professionals' Choice

Our reputation for quality won't let you down.

Since our inception in 1989, Sun Valley Skylights has worked to consistently deliver the finest possible results for our customers.

Our philosophy is simple. We design our systems to deliver a lifetime of superior performance and enjoyment.

The scope of our work extends to projects of any size or requirement. We can either build to your specifications or provide you with design assistance. We use state of the art computer aided design, engineering and manufacturing to produce your project accurately and efficiently. We also provide professional installation with our in-house crews.

We welcome the opportunity to help make your project that much more exceptional.

SOME INFORMATION ABOUT OUR PRODUCTS

Structure & Fabrication

We offer a wide selection of aluminum I-beam and tubular extrusions for skylights, solariums & conservatories.

On small units, frames are fully welded. For larger systems, a combination of welded parts and bolt together sections is typical. We can design our products to accommodate any special circumstances your project may have.

Through innovative design & assembly techniques, we can eliminate exposed hardware in most cases. This enables us to provide very large and complex structures without a single visible bolt or unfinished weld.

Wet stamped structural engineering is available for projects when required.

Glazing

You choice of glazing is practically unlimited within the scope of what is workable for your application.

Of the three major types of glazing to choose from (glass, plastic, fiberglass), glass offers the most diversity and creative opportunity.

Our frame system can accommodate any of the glazing options available.

We will gladly assist you with your selection and can provide structural, thermal and lighting performance specifications, as well as actual samples of your selections.

We can also provide art glass, such as sandblasted, etched, ceramic frit and glass with specialty coatings for improved performance.

Finishing

All fabrication is done with mill finish aluminum. Prior to applying the finish, each part is carefully inspected for defects or production scratches, which are polished out. Visible welds are ground smooth as well, to provide the most aesthetic appearance possible.

We can provide all appropriate finishes for aluminum, as well as cladding with copper, stainless steel or any metal suitable for forming the required shapes.

Kynar and Powder Coating are the typical paint finishes and are available in thousands of colors. Anodizing is also an option available for window and door products.

Installation

All installations performed by our in-house crew or qualified dealers are guaranteed to be leak free for 10 years.

City of L.A. Fabricators License #1637

Our firm holds a City of Los Angeles Fabricators license. Very few skylight manufacturers in the USA have earned this qualification.

JAMES LESLIE
JNL Glass, Inc.

"My crew was really amazed at how easily a project of this scope went together. You don't often find that today."

SLOPED GLAZING SYSTEMS

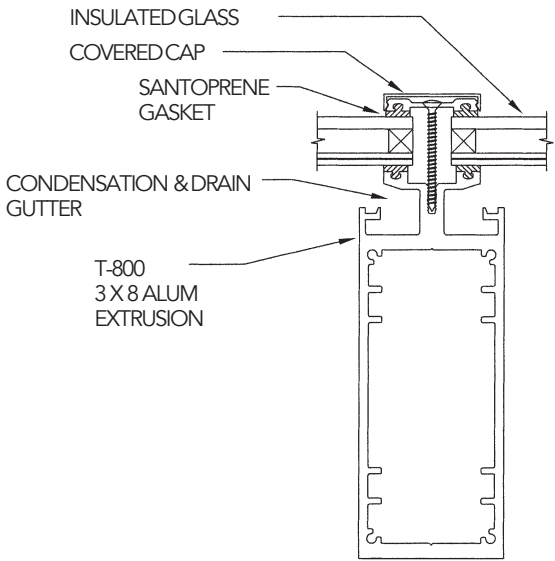

Glazing Systems designed to give a lifetime of leak free performance...

At Sun Valley Skylights, our exterior seal, designed for zero water penetration, is made from the finest materials available with a lifetime expectancy of up to 50 years.

Our interior water control is accomplished through the use of integrated gutters designed into our extrusions. This permanent system of gutters captures moisture from condensation or penetration and drains it to the outside.

Typical Rafter Design

“Sun Valley has been a fantastic resource when dealing with difficult projects that needed a custom solution no one else could provide.”

Sometimes it's what you can't see that matters the most...

If you asked our customers why they use Sun Valley Skylights, many would tell you it's because of our superior design and fabrication skills.

Many more would tell you it's because we're trustworthy and have a strong willingness to work hard for the project.

For us, it's all summed up in a very simple concept:
We want you to be our customer for life.

*"How do I think Sun Valley Skylights compares to other skylight manufacturers?
They're simply...the best!"*
